centific

Digital Workplace Security Experts
Making Your Business More Digitally Resilient

LAST YEAR ALONE, COMPROMISED BUSINESS EMAIL & CYBER COMMUNICATIONS
cost organizations $12.5 billion globally, with a single phishing attack now costing an estimated $18 million on average.

Undoubtedly, businesses today are more vulnerable than ever to cyber-security threats. Although many are expanding upon the tactics, products, and processes used to protect their information, fraudsters continue to lurk in the shadows, ready to exploit any and all vulnerabilities.

Making your business more digitally resilient isn't just about managing risk; it's also a strategic issue that impacts your organizational effectiveness and customer relationships, resulting in business disruption, opportunity loss, and reputational damage.

Centific enables enterprise organizations not only to block and mitigate cyber threats, but to predict and prepare in advance.

When Customer Trust Erodes, Revenue Weakens
Security Experts with Intelligent Tools That Put a Stop to Spam

The proliferation of spam presents a damaging, expensive, and evolving threat to organizations.

Centific delivers the resources, technology, and experience to build innovative solutions that safeguard enterprise organizations against malicious threats posed via digital communications, including email messages, URL links, and collaboration tools.

Detect

Multinational Technology Company

Global Rollout of Exchange Online Protection

Challenge: Corporate Email System Online Protection is a hosted e-mail security service, that filters/detect spam, malware, and mail flow to and from your organization. The service does not require client software installation but is activated by changing each customer's MX record. The challenge was to roll out the product for millions of global users with zero downtime.

Solution: Centific followed all client security guidelines, followed CI/CD processes, build pipeline, progress Monitoring and perform initial investigation for deployment issues and triage/escalate. Smooth migration was executed using our highly skilled SME's and DevOps team.

Results: Seamless global roll out was executed across 24X7 coverage in multiple time zones to ensure no interruption over non-business hours. On time migration delivery, handled tickets based on priority and ensured a smooth transition for millions of users.

Exclusive offering (No-cost & no-commitment) worth ~$25k USD - Workshop (1 - 10 Days) from Centific. Workshop can help with business case, scope definition and estimations.
